

nbKeyComp(K k1, K k2)

Return the **number of keys** one needs
to compare to in order to **find**
all keys in the range [k1, k2].

not the number of keys in the range

$\text{nbKeyComp}(33, 53) \rightarrow 7$
 $\text{nbKeyComp}(1, 60) \rightarrow 11$
 $\text{nbKeyComp}(58, 53) \rightarrow 1$

nbKeyComp(33, 53) \rightarrow 7
